Professional Summary

Full-Stack Web Developer with hands-on experience building applications using React.js on the frontend and Node.js with Express.js on the backend. Proficient in REST API design, JWT-based authentication, MongoDB, Firebase, and email automation workflows. Pursuing M.E. in Computer Engineering with a strong academic record (CGPA 8.96). Seeking a frontend or backend role to contribute clean, maintainable, and scalable code to a collaborative engineering team.

Education

LDRP Institute of Technology and Research <i>Master of Engineering (M.E.) in Computer Engineering (Pursuing) (current CGPA: 9.32)</i>	2025 - 2027
Gujarat Technological University (GECM) <i>Bachelor of Engineering in Computer Engineering with 7.91 CGPA</i>	2020 - 2024

Experience

Intern ReactJs Developer <i>The One Web Technology</i>	January 2024 - April 2024 Vadodara, India
- Built FoodZing, a fully responsive food-ordering web application using React.js and Firebase, with real-time database, user authentication, and a mobile-first UI. - Implemented reusable component architecture, reducing code duplication across pages and improving maintainability of the codebase. - Ensured cross-platform compatibility across web and mobile browsers by addressing layout and performance issues during testing.	

Academic Projects

URL Shortener Web Application <i>Node.js, Express.js, MongoDB, EJS, Zod</i>	Link
- Built a full-stack URL shortener allowing users to generate custom short links with unique shortcodes and manage them via a dashboard (create, edit, delete). - Implemented secure authentication using JSON Web Tokens (JWT) and Argon2 password hashing for protected, session-based access - Developed email-based flows for password reset (token links) and account verification (OTP) using Nodemailer and MJML. - Applied Zod schema validation on all API inputs to enforce data integrity and prevent duplicate or malformed entries.	
PublishPro- A Blogging Platform <i>ReactJS, NodeJs, MongoDB, ExpressJs, JWT, Cloudinary, Render</i>	Link
- Developed and deployed a full-stack blogging platform using the MERN stack featuring rich text editing (TinyMCE), search, category/tag filtering, view tracking, and Cloudinary-based image uploads. - Implemented a secure authentication system using JWT with httpOnly cookies, dual access/refresh tokens, silent token refresh via Axios interceptors, and multi-device session management with server-side session revocation. - Built user-centric features including likes, bookmarks, comments, profile management, and a personalized dashboard displaying blog statistics such as total posts, likes, views, and saved blogs. - Designed secure password management workflows with password reset, session invalidation on password change, and transactional email integration using Nodemailer/Resend while following OWASP security best practices.	

Technical Skills

Frontend Development: React.js, JavaScript(ES6+),HTML5, CSS3, Tailwind CSS, Bootstrap
Backend Development: Nodejs, Expressjs
Database and BaaS: MongoDB, MySQL, Firebase **ORM / Validation:** Prisma, Drizzle ORM, Zod
Tools and Design: Git, GitHub, Visual Studio Code, Figma, Canva
Soft Skills: Communication, Teamwork, Adaptability, Time Management, Work Ethic
